SUMMARY

Recent computer programming graduate with hands-on experience as a Programmer Analyst in the IT Application Dept' at YRDSB, specialized in analyzing requirements and resolving data errors using PL/SQL. My proven track record in international business adds a unique dimension to technical expertise. Eager to contribute as a dedicated and skilled Software Developer.

WORK EXPERIENCE

Programmer Analyst (Co-op)

Jan 2023 – Aug 2023

York Region District School Board | Richmond Hill, Ontario

- Analyzed issues, coded in PL/SQL, and conducted testing to correct incorrect data display on a web page, resolving 20 tasks within 8 months
- Collaborated daily with the Quality Management team, maintaining continuous communication to ensure accurate error data extraction, and implemented at least 3 revisions per task for error-free deployment across all tasks
- Generated reports using a database and report-writing tool (SSRS), enhancing data visualization and reporting efficiency

International Sales Officer

Oct 2016 – Nov 2020

OCEAN MARINE Co Ltd. | Ulsan, South Korea

- Analyzed existing sales data for key clients, developed tailored sales strategies, resulting in a sales growth of over 200% in 2019 compared to the previous year
- Acquired over 3 new clients by actively seeking new business partnerships as an International Sales Officer
- Managed 20+ clients across Asia, ensuring seamless communication and prompt feedback, resulting in an 87% satisfaction rate in the year-end 2019 customer service survey

EDUCATION

Computer Programming Program Diploma | Seneca Polytechnic | Toronto, Ontario

Dec 2023

Bachelor of Business Administration – Global Management | Ulsan University | Ulsan, Korea

Feb 2016

TECHNICAL SKILLS

- Language : C, C++, Python
- Web : JavaScript, CSS/HTML, React, Node.js, Typescript, Next.js, flask, Django, Bootstrap
- Database : MySQL, MSSQL, Oracle 12c, MongoDB, PostgreSQL, MariaDB
- Software : AWS, Vultr, Docker, Visual Studio, Visual Code, GIT, SSRS, MS TFS, MS Office
- Operating systems : Windows, Linux/Unix, IOS

ACADEMIC PROJECTS

Social Media Website: Stellagraphy – Python, Django, Bootstrap, Docker, AWS EC2

Aug 2024

<http://www.stellagraphy.site>

- Created a social media website where users can share their artworks or photos, like others' posts, and leave comments
- Utilized MagicGrid for dynamic rearrangement of posts, ensuring a seamless and responsive UI across web and mobile
- Implemented Docker for containerization and deployment of Django projects
- Deployed Django projects using AWS EC2, including instance setup, Docker installation, stack deployment, and domain configuration

e-Wallet Application – React, Node.js, Express.js, JWT, Redux, Stripe, MongoDB

Jan 2024

<https://e-walletapp-507dfd72e9f2.herokuapp.com>

- Developed an e-Wallet application with full server-side and client-side implementation using Node.js and React
- Implemented functionalities to facilitate depositing funds using Stripe and enabling money transfers
- Established secure login procedures by utilizing JWT Authentication and Password Encryption
- Developed separate user interfaces for users and administrators, enabling administrators to efficiently manage wallet access by accepting or rejecting user requests
